WGCNA modules: top 3 GO terms at FDR < 0.05 (overlap/term size)
black: response to hypoxia [BP]
black: response to decreased oxygen levels [BP]
black: response to oxygen levels [BP]
blue: transferase activity, transferring phosphorus-contain... [MF]
blue: NADH dehydrogenase activity [MF]
blue: respiratory chain complex [CC]
brown: negative regulation of DNA-templated transcription [BP]
brown: negative regulation of nucleobase-containing compound... [BP]
brown: negative regulation of RNA biosynthetic process [BP]
green: structural molecule activity [MF]
green: rRNA binding [MF]
green: structural constituent of ribosome [MF]
lightyellow: gene expression [BP]
lightyellow: macromolecule metabolic process [BP]
lightyellow: organelle [CC]
tan: catalytic complex [CC]
tan: protein-containing complex [CC]
turquoise: DNA-binding transcription factor activity [MF]
turquoise: transcription regulator activity [MF]
turquoise: lipid metabolic process [BP]
yellow: intracellular protein-containing complex [CC]
yellow: nuclease activity [MF]
yellow: hydrolase activity [MF]
